

West Slope, Ecuador 23 Apr - 1 May 2006

Roger Ahlman

Introduction

This trip report covers the west slope of Ecuador and a day-trip to Cotopaxi. The main site for this trip was the Canandé reserve in the Chocó lowlands where we spent four nights and three full days. The subtropics were only visited during one and a half day. The trip ended with a day at Cotopaxi. We recorded altogether 381 species and drove 850 km (which gives 0.45 species per km!)

Leaders

Jonas Nilsson, Roger Ahlman and Boris Herrera

Participants

Jim and Bonnie Olsen, Macklin Smith

The group celebrating the first successful morning at Paz de las Aves. From left to right: Macklin, Jim, Bonnie, Jonas, Boris and the 'Magic Man' - Angel Paz. Roger is obviously behind the camera.

Birding Sites

Bellavista

This lodge at 2100 m in the upper Tandayapa valley is well-known and has good roadside birding as well as trails and feeders. 5\$ entrance fee.

Paz de las Aves

This new site at 1900 m has habituated Giant-, Moustached- and Yellow-breasted Antpittas as well as a convey of Dark-backed Wood-quails as their star attraction. They've also got some hummingbird feeders. Visits has to be arranged with the owner. 10\$ entrance fee.

Ñanca Jatunmi

This is a lodge near a dead-end road west of the highway in the subtropics. Good roadside birding and along a logging trail at the end of the road.

Septimo Paraiso

This very nice lodge above Mindo has trails, feeders and makes for a good base to bird the nearby sites.

Milpe Road

Near los Bancos this dead end road offers good birding at around 1000 m. A new reserve has been created here and has trails into the forest and feeders. 8\$ entrance fee to the reserve, valid also for Rio Silanche. A kilometre further down the road is Milpe Garden, a new private reserve with trails that are easier to walk. 5\$ entrance fee.

Rio Blanco restaurant

This restaurant in los Bancos offers not only good food but they have feeders for both hummingbirds and other birds. Excellent viewing facilities while eating. We stayed here one night.

Km 106.5

This is a private 50 ha reserve in the foothills some 10 kms past los Bancos. Most of the birding is done in secondary habitat but further on is primary forest as well. 5\$ entrance fee.

Rio Silanche

At 400-500 m near Pedro Vicente Maldonado this site offers a different set of lowland Chocó birds. The habitat is heavily degraded but a patch has been protected and a canopy tower has recently been built here. 8\$ entrance fee, valid also for Milpe.

Canandé

This reserve owned by Fundacion Jocotoco offers access to lowland forest in the Chocó region. This was our first visit here and to be honest it was a bit of a disappointment. The foundation has got 1300 ha of forest here but you only bird in secondary forest albeit good secondary forest. Chain saws are heard all the time as a big logging company owns the neighbouring land. The lodge itself is highly overpriced and rather basic. Despite this, the site holds a good number of Chocó lowland birds that are hard to find elsewhere e.g. at Rio Silanche. I have nowhere in the world seen as many moths as here, some very big and spectacular once.

This Crane Hawk may be the first documented record for the Esmeraldas province

Diary

23 april

The clients were met at hotel Sebastian at 5.30 am for the drive to our first destination. We arrived at Paz de las Aves around 7.30 and went straight into the forest with the “magic guy” Angel Paz. He started to call for the Antpittas by name and soon we found Maria which is a Giant Antpitta and she was fed with worms and we got gripping views. Some Yellow-breasted Antpittas were also fed and he told us to stay put while he went away. He soon came back - with a convey of four Dark-backed Wood-quails on his trail! The Moustached Antpitta took some time to call in but eventually we all had good looks at that one too. On the way back we found a female Orange-breasted Fruiteater before ending our birding session in the forest with some hummingbirds. A cup of coffee and ‘bolones verdes’ at the house was nice after the forest walk. Just when we were about to leave we found a stunning male Orange-breasted Fruiteater just by the house! Prolonged, gripping views and good pictures ended a very good morning. We continued down the mountain to los Bancos and the nice restaurante Rio Blanco. Good food and some birds in the garden. Afternoon along Milpe road in light drizzle. We did pick up Moss-backed Tanager and Yellow-collared Chlorophonia.

24 april

We started with a walk at km 106.5, which is a private reserve. Rather slow but the early morning rain may have held back the activity. We did find a pair of Black-and-white Owls on their daytime roost and after some playback everyone had got good looks at Black-headed Antthrush. We continued to Pedro Vicente Maldonado and spent a few afternoon hours at Rio Silanche without seeing anything special.

25 april

Again we went to Rio Silanche and spend most part of the morning at the new canopy tower but activity was rather slow. On the way back we heard a Brown Wood-rail calling but it never showed itself. After lunch we started the long drive to Canandé. North of Rio Canandé there is some habitat along the road and a stop here yielded the local Slate-coloured Seedeater. We arrived at the lodge around 5 pm and did some birding around the lodge while installing ourselves.

26 april

Today should be a long day. We sat off at 6.30 for the ridge trail bringing box lunch. All day walking up to the ridge and a poor box lunch at the viewpoint. We came back to the lodge at 5.30 pm after 11 hours walk and some good birds in the bag like Lita-, Cinnamon- and Crimson-bellied Woodpeckers, Dagua Thrush, Rufous Piha etc.

27 april

We woke up to the sound of rain and that was to be the wheather until lunch. After lunch we walked down the road

and onto a logging trail. Roger found a perched Black-and-white Hawk-eagle but birding was slow along the trail until we found a flock that had most of the lowland tanagers, Scarlet-breasted Dacnis and others. A perched Plumbeous Hawk was nice. The steep uphill back split up the group and I was ahead of the others and was rewarded with a Semi-plumbeous Hawk at the lodge. That one would have been new to Jonas but he would have to wait.

28 april

Again we tried the logging trail as it looked good yesterday. A short bit down the road and Jonas and the others got their Semi-plumbeous Hawk. Along the trail we again found goodies like Blue-whiskered Tanager, Scarlet-breasted Dacnis, Slate-throated Gnatcatcher, Tiny Hawk, White-ringed Flycatcher and others. A short walk on the trails by the lodge didn't produce much.

29 april

Rain in the morning. Those that went out early was rewarded with seen Spectacled Owl while Chocó Screech-owl and Poorwill were only heard. After breakfast we headed back to civilization making numerous stops along the way. Some of the goodies we found included Crane Hawk and Northern Tufted-Flycatcher, slight range-extensions to the north and south respectively. Most of the day was just driving to Septimo Paraiso above Mindo where we arrived in the late afternoon and did a short walk around the lodge.

30 april

Early start and some night-birding around the lodge. Seen Wattled Guan and heard Mottled Owl was the result. After some playbaking we eventually got to see a Scaled Antpitta. After breakfast we did a walk on the trails and had good looks at Ochre-breasted Antpittas among other things. We sat off for Bellavista making a few stops along the way. By midday it was rather quiet but we found Flammulated Treehunter and Plate-billed Mountain-Toucan before enjoying our box-lunch. A drizzly afternoon hour at Nanca Jatunmi was surprisingly rewarding with Moss-backed- and Glistering-green Tanagers and seen Cloud-forest Pygmy-Owl. The trip back to Quito was eventless and this was the end of the main trip.

1 may

Today Roger and Macklin went to Cotopaxi for some high-altitude birding. The plain around laguna Limpiopongo produced the usual stuff like Stout-billed Cincloides and Paramo Ground-Tyrant. Near the lake Streak-backed Canasteros showed well but the search for Noble Snipe ended in a less glorious way with Roger sinking down to the waist and Macklin got wet as well! And we didn't see the snipe. Ecuadorian rail was heard and 9 Blue-winged Teals lingered in the lake. Higher up the mountain we saw an Ecuadorian Hillstar before we decided to try another site. Lunch at Hacienda Cienega nearby was good but a lot of people today. Nearby we soon found Streak-throated Bush-Tyrant and Chiguanco Thrush. After some playbaking we had gripping views of Ecuadorian Rail. A nice end to a very good trip.

Plumbeous Hawk is a scarce raptor found in the forest interiors

*Front cover photos: Plumbeous Hawk at Canandé.

Report compiled by Roger Ahlman (rahlman2002@yahoo.se)

List of Species

TINAMOUS *TINAMIDAE*

Great Tinamou *Tinamus major*

1 heard at Canandé

Little Tinamou *Crypturellus soui*

Heard at Milpe, Rio Silanche and Canandé

CORMORANTS *PHALACROCORACIDAE*

Neotropic Cormorant *Phalacrocorax brasilianus*

Singles seen at Rio Blanco restaurant

DUCKS, GEESE, AND SWANS *ANATIDAE*

Andean Teal *Anas andium*

10 at Cotopaxi

Yellow-billed Pintail *A. georgica*

10 at Cotopaxi

Blue-winged Teal *A. discors*

6 males and 3 females at Cotopaxi

HERONS, BITTERNS, AND EGRETS *ARDEIDAE*

Cattle Egret *Bubulcus ibis*

10 seen near Pedro Vicente Maldonado

Striated Heron *Butorides striatus*

1 seen en route to Canandé

AMERICAN VULTURES *CATHARTIDAE*

Black Vulture *Coragyps atratus*

Common, with only singles at Canandé

Turkey Vulture *Cathartes aura*

Common, with only singles at Canandé

KITES, EAGLES, AND HAWKS *ACCIPITRIDAE*

Swallow-tailed Kite *Elanoides forficatus*

1 seen at Milpe road and 2-3 at Septimo Paraiso

Plumbeous Kite *Ictinia plumbea*

1 seen at Canandé

Plain-breasted Hawk *Accipiter ventralis*

1 seen Paz de las Aves

Tiny Hawk *Accipiter superciliosus*

1 female seen at Canandé

Crane Hawk *Geranospiza caerulescens*

1 seen near Canandé

According to Ridgely & Greenfield 2001, this species is not known from Esmeraldas but Boris has seen it twice near Canandé.

Plumbeous Hawk *Leucopternis plumbea*

1 bird seen two days at Canandé

Semi-plumbeous Hawk *Leucopternis semiplumbea*

2 birds seen at Canandé

Gray Hawk *Buteo nitidus*

1 seen near Rio Canandé

Roadside Hawk *Buteo magnirostris*

2 seen at Paz de las Aves, 1 seen near Pedro Vicente Maldonado and 1 heard at Canandé

White-rumped Hawk *Buteo leucorrhous*

1 seen between San Tadeo and Bellavista

Short-tailed Hawk *Buteo brachyurus*

1 seen at Rio Blanco restaurant

Semi-plumbeous Hawk is, like Plumbeous Hawk, mostly found inside the forest

Black-and-white Hawk-Eagle *Spizastur melanoleucus*
1 seen at Canandé

FALCONS AND CARACARAS FALCONIDAE

Carunculated Caracara *Phalcoboenus carunculatus*
2 adults seen at Cotopaxi

Barred Forest-Falcon *Micrastur ruficollis*
1 heard at Septimo Paraiso

Plumbeous Forest-Falcon *Micrastur plumbeus*
2 heard at Canandé

Laughing Falcon *Herpetotheres cachinnans*
2 heard at Rio Silanche and 1 seen at Canandé

American Kestrel *Falco sparverius*
3 seen at Paz de las Aves

Bat Falcon *Falco rufigularis*
1 seen at Rio Silanche

CURASSOWS, GUANS, AND CHACHALACAS CRACIDAE

Andean Guan *Penelope montagnii*
1 seen along the road to Quito

Wattled Guan *Aburria aburri*
1 seen at Septimo Paraiso

NEW WORLD QUAILS ODONTOPHORIDAE

Rufous-fronted Wood-Quail *Odontophorus erythrops*
Heard daily at Canandé

Dark-backed Wood-Quail *Odontophorus melanonotus*
4 habituated birds seen at Paz de las Aves

RAILS, GALLINULES, AND COOTS RALLIDAE

White-throated Crake *Laterallus albigularis*
1 seen at Rio Silanche and 1 heard en route to Canandé

Ecuadorian Rail *Rallus aequatorialis*
1 heard at Cotopaxi and 1 seen at Hacienda Cienega

Brown Wood-Rail *Aramides wolfi*
1 heard near Rio Silanche

SANDPIPERS, SNIPES, PHALAROPES SCOLOPACIDAE

Lesser Yellowlegs *Tringa flavipes*
1 seen at Cotopaxi

PLOVERS AND LAPWINGS CHARADRIIDAE

Andean Lapwing *Vanellus resplendens*
30 seen at Cotopaxi
16/4 at least 200 were seen here suggesting local movements

GULLS AND TERNS LARIDAE

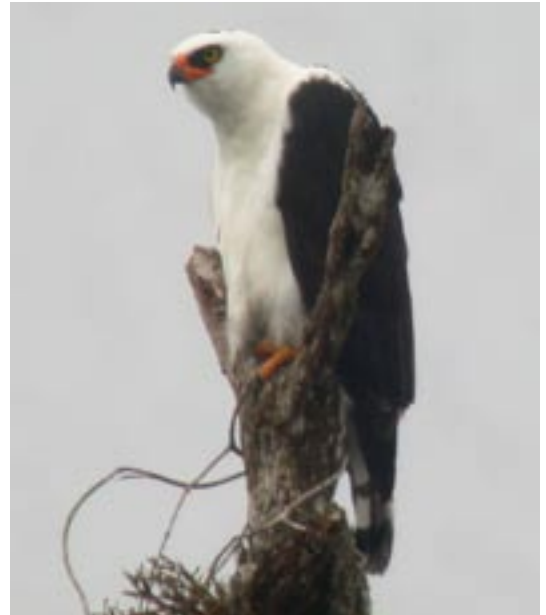

Andean Gull *Larus serranus*
50 at Cotopaxi

PIGEONS AND DOVES COLUMBIDAE

Rock Pigeon *Columba livia*
Seen in cities and villages

Band-tailed Pigeon *Columba fasciata*
2 seen at Paz de las Aves and 5 seen en route to Quito

Ruddy Pigeon *Columba subvinacea*
Singles heard and a few seen all days except at Cotopaxi

The rare and impressive Black-and-white Hawk-Eagle is always a spectacular sight. This individual showed very well close to the lodge

Plumbeous Pigeon *Columba plumbea*

2 seen at Paz de las Aves

Dusky Pigeon *Columba goodsoni*

Fairly common at Canandé

Eared Dove *Zenaida auriculata*

Seen in the highlands

Ecuadorian Ground-Dove *Columbina buckleyi*

2 seen en route from Canandé

Blue Ground-Dove *Claravis pretiosa*

2 heard near Rio Canandé

White-tipped Dove *Leptotila verreauxi*

1 heard at Paz de las Aves, 1 seen en route from Canandé and

1 seen at Ñanca Jatunmi

Pallid Dove *Leptotila pallida*

1 seen at km 106.5 and 1 at Rio Silanche, 1 seen at Canandé

Indigo-crowned Quail-Dove *Geotrygon purpurata*

1 heard at Canandé

Olive-backed Quail-Dove *Geotrygon veraguensis*

1 heard at Canandé

White-throated Quail-Dove *Geotrygon frenata*

1 seen at Septimo Paraiso

Ruddy Quail-Dove *Geotrygon montana*

2 ad and 1 pull seen at Canandé

PARROTS AND MACAWS *PSITTACIDAE*

Great Green Macaw *Ara ambigua*

1 seen from the lodge at Canandé

Maroon-tailed Parakeet *Pyrrhura melanura*

Singles or small groups seen or heard at most places.

Pacific Parrotlet *Forpés coelestis*

5 seen at Rio Silanche and 5 seen near Canandé

Rose-faced Parrot *Pionopsitta pulchra*

Heard 1 day at Canandé and 2 seen en route from Canandé

Blue-headed Parrot *Pionus menstruus*

5 seen at Rio Silanche, heard and/or seen most days at Canandé

Red-billed Parrot *Pionus sordidus*

2 seen at Septimo Paraiso

Bronze-winged Parrot *Pionus chalcopterus*

Common in the lowlands up to Milpe

Scaly-naped Amazon *Amazona mercenaria*

1 heard at Bellavista

Mealy Amazon *Amazona farinosa*

4 seen most days from the lodge at Canandé

CUCKOOS AND ANIS *CUCULIDAE*

Squirrel Cuckoo *Piaya cayana*

Singles seen daily at most sites

Little Cuckoo *Piaya minuta*

1 seen at Rio Silanche

Smooth-billed Ani *Crotophaga ani*

Fairly common from Mindo and lower down. Absent from Canandé

Striped Cuckoo *Tapera naevia*

2 seen en route from Canandé

TYPICAL OWLS *STRIGIDAE*

Chocó Screech-Owl *Otus centralis*

1 heard at Canandé

Dark-backed Wood-quails at Paz de las Aves. They, like the Antpittas, were being hand-fed!

Cloud-forest Pygmy-Owl *Glaucidium nubicola*

1 heard and seen at Ñanca Jatunmi

Spectacled Owl *Pulsatrix perspicillata*

1 heard and seen at Canandé

Black-and-white Owl *Strix nigrolineata*

1 pair seen on day-time roost at km 106.5, 1 heard at Canandé

Mottled Owl *Strix virgata*

2 heard at Septimo Paraiso

POTOOS *NYCTIBIIDAE*

Common Potoo *Nyctibius griseus*

1 seen at Paz de las Aves on day-time roost

NIGHTJARS AND NIGHTHAWKS *CAPRIMULGIDAE*

Short-tailed Nighthawk *Lurocalis semitorquatus*

1 seen near Rio Silanche and 1 seen at Canandé

Pauraque *Nyctidromus albicollis*

1 heard near Septimo Paraiso

Chocó Poorwill *Nyctiphrynus rosenbergi*

1 heard and seen briefly at Canandé

Band-winged Nightjar *Caprimulgus longirostris*

1 heard in Quito at hotel Sebastian

SWIFTS *APODIDAE*

White-collared Swift *Streptoprocne zonaris*

Common

Chestnut-collared Swift *Cypseloides rutilus*

10 seen at Bellavista

Band-rumped Swift *Chaetura spinicauda*

Common at Canandé

Gray-rumped Swift *Chaetura cinereiventris*

Fairly common at Rio Silanche

Lesser Swallow-tailed Swift *Panyptila cayennensis*

2 seen at Milpe and 5 seen at Rio Silanche

HUMMINGBIRDS *TROCHILIDAE*

Bronzy Hermit *Glaucis aenea*

1 seen at Hosteria Ayalir near PVM

White-whiskered Hermit *Phaethornis yaruqui*

Singles seen almost daily from Bellavista down to Canandé

Tawny-bellied Hermit *Phaethornis syrmatorphorus*

1 seen at Paz de las Aves

Stripe-throated Hermit *Phaethornis striigularis*

2+1 seen at Canandé

White-tipped Sicklebill *Eutoxeres aquila*

1 seen at km 106.5 and 1 seen at Canandé

Tooth-billed Hummingbird *Androdon aequatorialis*

1 seen at Canandé

White-necked Jacobin *Florisuga mellivora*

1 seen at Septimo Paraiso

Brown Violetear *Colibri delphinae*

2 seen at Septimo Paraiso

Green Violetear *Colibri thalassinus*

2 seen at Paz de las Aves

Sparkling Violetear *Colibri coruscans*

1 seen at Septimo Paraiso, common at Hac Cienega

Green Thorntail *Popelairia conversii*

7 seen at restaurant Rio Blanco, los Bancos, 2 females at Canandé

Male Purple-chested Hummingbird at Canandé

Western Emerald *Chlorostilbon melanorhynchus*

1 seen at Paz de las Aves

Green-crowned Woodnymph *Thalurania fannyi*

Common around Mindo - Milpe

Violet-bellied Hummingbird *Damophila julie*

2 males seen at Canandé

Rufous-tailed Hummingbird *Amazilia tzacatl*

Seen all days except at Cotopaxi

Andean Emerald *Amazilia franciae*

2 seen at Milpe and 3 at Septimo Paraiso

Blue-chested Hummingbird *Amazilia amabilis*

2 seen at Canandé

Purple-chested Hummingbird *Amazilia rosenbergi*

Singles seen daily at Rio Silanche and Canandé

Speckled Hummingbird *Adelomyia melanogenys*

3 seen at Paz de las Aves and 2 at Bellavista

Purple-bibbed Whitetip *Urosticte benjamini*

1 seen at Septimo Paraiso

Empress Brilliant *Heliodoxa imperatrix*

2 seen at Paz de las Aves and 1 seen at Ñanca Jatunmi

Green-crowned Brilliant *Heliodoxa jacula*

Singles at Septimo Paraiso, Milpe and Rio Blanco

Fawn-breasted Brilliant *Heliodoxa rubinoides*

3 seen at Paz de las Aves

Ecuadorian Hillstar *Oreotrochilus chimborazo*

1 seen at Cotopaxi

Brown Inca *Coeligena wilsoni*

3 seen at Paz de las Aves and 2 at Ñanca Jatunmi

Collared Inca *Coeligena torquata*

2 seen at Bellavista

Buff-tailed Coronet *Boissonneaua flavescens*

1 seen at Paz de las Aves and 1 seen at Bellavista

Velvet-purple Coronet *Boissonneaua jardini*

2 seen at Paz de las Aves

Gorgeted Sunangel *Helianthus strophianus*

1 seen at Bellavista

Booted Racket-tail *Ocreatus underwoodii*

3 seen at Paz de las Aves and 5 at Septimo Paraiso

Black-tailed Trainbearer *Lesbia victoriae*

1 male seen at Cotopaxi

Violet-tailed Sylph *Agelaiocercus coelestis*

Singles at Paz de las Aves, Septimo Paraiso and Ñanca Jatunmi

Purple-crowned Fairy *Heliothryx barroti*

Singles seen at Canandé most days

Long-billed Starthroat *Helimaster longirostris*

1 seen at Hostería Ayalir near PVM, 1 seen at Canandé

Purple-throated Woodstar *Calliphlox mitchellii*

4 seen at Paz de las Aves and 1 at Septimo Paraiso

TROGONS AND QUETZALS *TROGONIDAE*

Golden-headed Quetzal *Pharomachrus auriceps*

2 seen at Septimo Paraiso

Chocó Trogon *Trogon comptus*

1 seen at Rio Silanche, heard most days at Canandé

Western White-tailed Trogon *Trogon chionurus*

1 seen at Rio Silanche, singles seen or heard all days at Canandé

Female Fawn-breasted Brilliant at Paz de las Aves

Collared Trogon *Trogon collaris*

1 heard at Canandé

Masked Trogon *Trogon personatus*

Heard at Paz de las Aves and Septimo Paraiso and 1 seen at Ñanca Jatunmi

Black-throated Trogon *Trogon rufus*

1 female seen at km 106.5

MOTMOTS *MOMOTIDAE*

Broad-billed Motmot *Electron platyrhynchum*

1 seen at Rio Silanche, Seen or heard most days at Canandé and

1 seen at Septimo Paraiso

Rufous Motmot *Baryphthengus martii*

Singles heard at Canandé

JACAMARS *GALBULIDAE*

Rufous-tailed Jacamar *Galbula ruficauda*

2 heard at Rio Silanche, Up to 5 seen at Canandé

Great Jacamar *Jacamerops aureus*

1 seen at Canandé

PUFFBIRDS *BUCCONIDAE*

Barred Puffbird *Nystalus radiatus*

2 seen at Canandé with 1 or 2 more heard

White-whiskered Puffbird *Malacoptila panamensis*

2-3 seen at Canandé

NEW WORLD BARBETS *CAPITONIDAE*

Orange-fronted Barbet *Capito squamatus*

2 seen at Rio Silanche. Up to 10 seen at Canandé

Red-headed Barbet *Eubucco bourcierii*

Heard at Rio Silanche and daily at Canandé. 2 seen at Septimo Paraiso

Toucan Barbet *Semnornis ramphastinus*

2 seen at Paz de las Aves, 1 seen at Septimo Paraiso and 2 seen at Ñanca Jatunmi

TOUCANS *RAMPHASTIDAE*

Crimson-rumped Toucanet *Aulacorhynchus haematopygus*

Heard at Paz de las Aves, Canandé and Ñanca Jatunmi

Pale-mandibled Araçari *Pteroglossus erythropygius*

Small groups most days between Milpe and Canandé

Plate-billed Mountain-Toucan *Andigena laminirostris*

1 seen at Bellavista

Chocó Toucan *Ramphastos brevis*

Fairly common between Mindo and Canandé

Chestnut-mandibled Toucan *Ramphastos swainsonii*

Fairly common at Rio Silanche and Canandé

WOODPECKERS AND PICULETS *PICIDAE*

Olivaceous Piculet *Picumnus olivaceus*

1 seen at Canandé

Crimson-mantled Woodpecker *Piculus rivolii*

2 heard at Bellavista

Golden-olive Woodpecker *Piculus rubiginosus*

1 seen at km 106.5 and 1 seen at Rio Silanche

Lita Woodpecker *Piculus litae*

2+1 seen at Canandé

Cinnamon Woodpecker *Celeus loricatus*

2 seen and 1 heard at Canandé

Female Empress Brilliant at Paz de las Aves

Lineated Woodpecker *Dryocopus lineatus*

1 seen at Rio Silanche and 3 seen at Canandé

Black-cheeked Woodpecker *Melanerpes pucherani*

1 seen at Rio Silanche 31.12, 5 seen daily at Canandé

Smoky-brown Woodpecker *Veniliornis fumigatus*

1 heard at Paz de las Aves, 1 seen at Rio Silanche and 1 seen at Septimo Paraiso

Red-rumped Woodpecker *Veniliorni kirkii*

1 seen at Rio Silanche and 5 seen at Canandé

Guayaquil Woodpecker *Campephilus गयाquilensis*

1 seen at Rio Silanche

Crimson-bellied Woodpecker *Campephilu haematogaster*

1 heard at km 106.5 and 1 seen at Canandé

OVENBIRDS *FURNARIIDAE*

Bar-winged Cinclodes *Cinclodes fuscus*

5 seen at Cotopaxi

Stout-billed Miner *Cinclodes excelsior*

5 seen at Cotopaxi

Pacific Hornero *Furnarius cinnamomeus*

Fairly common from Mindo down to Rio Silanche, absent from Canandé

Azara's Spinetail *Synallaxis azarae*

Singles heard at Septimo Paraiso

Slaty Spinetail *Synallaxis brachyura*

Fairly common from Septimo Paraiso down to Canandé

Rufous Spinetail *Synallaxis unirufa*

1 heard at Bellavista

Red-faced Spinetail *Cranioleuca erythrops*

1 heard at Milpe road and 3 seen at Septimo Paraiso

Streak-backed Canastero *Asthenes wyatti*

2 seen at Cotopaxi

Many-striped Canastero *Asthenes flammulata*

2 heard at Cotopaxi

Streaked Tuftedcheek *Pseudocolaptes boissonneautii*

3 seen at Bellavista

Pearled Treerunner *Margarornis squamiger*

1 seen at Bellavista

Spotted Barbtail *Premnoplex brunnescens*

Heard at Paz de las Aves and Bellavista, 1 seen at Septimo Paraiso

Lineated Foliage-gleaner *Syndactyla subalaris*

1 seen at Paz de las Aves, heard at Septimo Paraiso

Scaly-throated Foliage-gleaner *Anabacerthia variegaticeps*

2 seen at Milpe road

Buff-fronted Foliage-gleaner *Philydor rufus*

2 seen at Milpe road and 2 seen at km 106.5

Flammulated Treehunter *Thripadectes flammulatus*

2 seen at Bellavista

Streak-capped Treehunter *Thripadectes virgaticeps*

1 seen at Paz de las Aves and 2 seen at Septimo Paraiso

Plain Xenops *Xenops minutus*

Singles seen at Milpe, Rio Silanche and Canandé

Tawny-throated Leaftosser *Sclerurus mexicanus*

1 heard at Septimo Paraiso

WOODCREEPERS *DENDROCOLAPTIDAE*

Tyrannine Woodcreeper *Dendrocincla tyrannina*

2 heard at Paz de las Aves and 1 heard below Bellavista

Male Western White-tailed Trogon at Canandé

Plain-brown Woodcreeper *Dendrocincla fuliginosa*

2 seen at km 106.5 and 3 seen at Canandé

Wedge-billed Woodcreeper *Glyphorhynchus spirurus*

A few seen daily at Canandé

Strong-billed Woodcreeper *Xiphocolaptes promeropyrhynchus*

1 heard near Bellavista

Northern Barred-Woodcreeper *Dendrocolaptes sanctithomae*

4 seen at Canandé

Black-striped Woodcreeper *Xiphorhynchus lachrymosus*

2 seen at Rio Silanche and 4 seen at Canandé

Spotted Woodcreeper *Xiphocolaptes erythropygius*

Singles most days

Streak-headed Woodcreeper *Lepidocolaptes souleyetii*

2 seen at Rio Silanche and 1 heard at Canandé

Montane Woodcreeper *Lepidocolaptes lachrymiger*

3 seen at Septimo Paraiso

Broad-billed Motmot at Canandé

TYPICAL ANTBRDS *THAMNOPHILIDAE*

Fasciated Antshrike *Cymbilaimus lineatus*

1 heard at Canandé

Western Slaty-Antshrike *Thamnophilus atrinucha*

1 heard at Rio Silanche 30.12 and about 5 seen and/or heard at Canandé

Russet Antshrike *Thamnistes anabatinus*

1 seen at km 106.5, 2 seen at Rio Silanche and 2 seen at Canandé

Plain Antvireo *Dysithamnus mentalis*

1 seen at Canandé

Spot-crowned Antvireo *Dysithamnus puncticeps*

2 seen at km 106.5, 2 heard at Canandé

Griscom's Antwren *Myrmotherula ignota*

2 seen and 1 heard at Canandé

Pacific Antwren *Myrmotherula pacifica*

2 seen at Rio Silanche, Up to seen and/or heard at Canandé daily

Checker-throated Antwren *Myrmotherula fulviventris*

2 seen at km 016.5, 2 heard at Rio Silanche and 6 seen at Canandé

White-flanked Antwren *Myrmotherula axillaris*

Singles seen or heard daily at Canandé

Dot-winged Antwren *Microrhophias quixensis*

2 seen at km 106.5, 2 seen at Rio Silanche and 5 seen at Canandé

Long-tailed Antbird *Drymophila caudata*

3 seen at Septimo Paraiso

Dusky Antbird *Cercomacra tyrannina*

2 heard at Canandé

Spotted Antbird *Hylophylax naevioides*

2 females seen at Canandé

Immaculate Antbird *Myrmeciza immaculata*

Singles heard at km 106.5, Rio Silanche, Canandé and Septimo Paraiso

Chestnut-backed Antbird *Myrmeciza exsul*

Commonly heard from km 106.5 to Canandé
