## Introduction

In October 2005, DOF Travel a department of the Copenhagen department of the Danish Ornithological Society (DOF) carried out another tour to Brazil.

The tour was designed to give the participants a thorough coverage of the most well known sites like Transpantania, Chapada dos Guimarães, Rio Cristalino Lodge, Emas N.P., and Foz de Iguacu. At the end of the tour we spent few days at the new Atlantic rain forest park Intervalles. On the DOF Travel tour we made up a bird list of 604 species. Marianne and Erik had on their extension additional 44 species not seen on the DOF Travel tour. The total list of species in the report is 648.

The weather during the tour was nice. From sunny and very hot in Transpantania and Emas, to sunny and nice at most places. At Iguacu and Intervalles we had some showers.

The participants were: Kenneth Darborg, Morten H. Nielsen, Orla Døssing, Anette Friis and Morten Pedersen, Mona E. Borg and Arne Borg, Vibeke Skov Møller and Flemming Møller, Carl Axel Henriksen, Karen Hauge Mikkelsen and Jørgen Mørup Jørgensen, Marianne and Erik Mølgaard (tour leader).

The tour fee was DKK 36,500 (approx. 4.865 EUR) including all transportation from Denmark, accommodation, full board, guides, and "official" tips, tour leaders as well as the usual DOF Travel services.

Birding Brazil in Manaus with Nadime and Andrew Whittaker ([andrew@birdingbraziltours.com](mailto:andrew@birdingbraziltours.com)) organised the whole trip. The arrangement was very well organised and I can recommend the company making perfect bird trips.

On the tour we had two birding guides. In Transpantania, Chapada dos Guimarães, Rio Cristalino Lodge, and Emas N.P. it was Braulio Carlos. In Intervalles it was Carlos Eduardo. Both are highly recognised for their knowledge of the birds of Brazil and being together with each of them was very pleasant. At Foz de Iguacu we should have had Miguel Castelino, but there was illness in the family so he had to send two friendly naturalist guys, but no birding guides.

The report contains the following sections,

1. Summary of the Journey
2. List of Birds
3. List of Mammals and Reptiles

Species observed only by one or two persons are marked in the bird and mammals lists with initials of the observers in brackets.

After the DOF Travel excursion Marianne and Erik Mølgaard had an extension week to Central Brazil. The observations for this week are included in this report.

It should not be forgotten that the whole trip was characterised by good fellowship and the pleasure of being together. Again it is a pleasure to look back on a successful DOF Travel tour! We hope to see all of you again!
